

# Etude e-Payment Solutions for Local Government

Working with Local Government to deliver online payment services

*How do I set up an online payment facility?  
..that only costs 9p per transaction  
- Use the approved Government Gateway Payment Engine!*

Etude is working with local government authorities and building e-Payment solutions that cost only 9p per transaction, using the Etude DIS (Departmental Interface Server) and the Government Gateway. Local government is benefiting from uptake in the use of the Gateway and its payment engine facility to deploy efficient and profitable online payment systems. For applications involving a volume payment transactions, the cost per transaction can be as little as only 3p.

A complete e-Payment solution is available now from Etude which helps integrate the Gateway payment facility into a website portal or back office systems to provide a robust and very cost effective online e-Payment service.

## Background and Expertise

Etude is an IT consultancy practice specialising in XML and Java based technologies and has developed an accredited DIS solution for connecting to the Government Gateway. This has given us a unique understanding of the Gateway and the challenges faced by Local Authorities with their e-enablement and transformation programmes.

Our many years experience of IT project management, delivery and deployment, using specialist Etude resources and project teams, has provided our customers with an efficient service to get projects and services delivered fast, on time and to budget.

## We can help you with

Government Gateway projects:

- Specialist project resources to help set-up and enable DIS and Gateway solutions into your local authority projects and services.
- Setting up and integrating Gateway services such as e-Payments, Registration and Enrolment.

e-Payments projects:

- Using the Etude e-Payments Package

General local authority project delivery and resources:

- Experienced project practitioners to help deliver your project on-time and to budget
- Independent advice and consultancy

Etude's consultants and resources can work on-site as part of your project team or can undertake outsourced design, development and deployment of whole projects or specified components.

### Our Core Services

Building on our consultancy and practitioner experience gained both within the private and public sectors over the last 7 years, we can deliver the following core professional services and capabilities:

- e-government feasibility studies, planning and pilot projects
- Gateway and DIS project advice and consulting
- Business consulting and project scoping
- Business process re-engineering and business transformation
- Requirements analysis, business and systems architecture
- Project design build and implementation

### Partnerships

While we remain independent and recommend the use of best practice, we do work closely with several partners including the e-Government Unit (eGU) and IBM. We also have close associations with some major local government systems integrators.

### Clients

Private Sector Clients :

John Lewis, Waitrose, Sainsburys, Tesco, Dawson, Centrica, Orange, EDS, Logica, PWC, Alliance and Leicester, CIMS, Deutsche Bank, Helphire, HSBC
